Art Unit: 3651

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Bobrowski (U.S. Patent 5,094,334).

Bobrowski shows a first gear box 80 having a first input 90 connected to a rotatable power source 63 for rotation about a first axis and a first output 92 rotatable about a second axis angularly related to the first axis, a second gear box 81 having a second rotatable input 93 connected in rotatably driven relation to the first output for rotation about the second axis and a second output 95 rotatably drivable about a third axis angularly related to the second axis by rotation of the second input. Also shown is an elongate conveyor assembly 35 having it's first end connected to second output 95, a rotatable element 38 positioned within a housing 36, and the elongate conveyor is mounted such that's it's free end may be moved between raised and lowered positions. See Figures 1 and 2 and column 5, lines 44-60.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
